

DEBLEENA BOSE

Frontend Technical Lead | Angular Architect | AI-Augmented Development (GitHub Copilot)

debleenabose03@gmail.com | +91 7890739909 | Hyderabad, India | LinkedIn

PROFESSIONAL SUMMARY

Frontend Technical Lead with 5+ years of experience architecting scalable, high-performance Angular applications (component architecture, RxJS, NgRx, Angular Signals, routing, forms) and driving AI-augmented development practices using GitHub Copilot and Copilot Chat to accelerate delivery, strengthen testing, and improve code quality. Skilled in TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS, and modern build tooling (Angular CLI, Webpack), with a working understanding of how AI/LLM capabilities (chat, suggestions, summarization) integrate into user-facing applications, including hands-on experience integrating LLM APIs into production apps. Optimizes Angular applications for performance, including lazy loading, change detection, and bundle size. Proven record of leading AngularJS-to-Angular (v17+) migrations, implementing Micro-Frontend Architecture (Module Federation) for scalable multi-team delivery, setting frontend engineering standards, mentoring and guiding engineering teams, conducting design/code reviews, and owning delivery in close collaboration with product, design, and backend stakeholders.

CORE SKILLS

- **Frontend Frameworks & Languages:** AngularJS, Angular (v7, v8, v9, v10, v11, v12, v13, v14, v15, v16, v17, v18, v19), TypeScript (strict typing, generics, interfaces), JavaScript (ES6+), HTML5, CSS3/SCSS (Flexbox, CSS Grid), Bootstrap, Material Design, Tailwind CSS
- **UI Architecture:** Micro-Frontend Architecture, Module Federation, Scalable UI Architecture, Modular Component Design, Design Systems, Responsive Web Design, Accessibility (WCAG)
- **State Management:** NgRx, RxJS, Angular Signals
- **UI Component Libraries:** PrimeNG, Angular Material
- **Performance & Build Tools:** Angular CLI, Webpack, Lazy Loading, Change Detection Optimization, Bundle Size Optimization, Performance Tuning
- **Data Visualization:** D3.js, complex multi-dimensional data-visualization modules and enterprise dashboards
- **Testing & Quality:** Jasmine, Karma, Jest (unit testing), Test-Driven Development (TDD), Debugging (Browser DevTools)
- **DevOps & CI/CD:** Git, GitHub, GitLab CI/CD, Jenkins, Code Reviews, Automated Quality Gates
- **Collaboration:** Agile/Scrum, REST API Integration & Contracts, Cross-Functional Stakeholder Collaboration, Technical Documentation, Mentoring
- **AI-Augmented Development:** GitHub Copilot, Copilot Chat (regular daily use for code generation, review, and testing), integrated LLM APIs into user-facing applications to power chat, suggestions, and summarization features
- **Full-Stack & Cloud Learning Exposure:** React, Node.js, Python, SQL (query writing), Shell Scripting, AWS, Azure Pipelines / Azure DevOps, .NET / ASP.NET Core

WORK EXPERIENCE

High-Scale Mass Engagement & Data Analytics Platform (I-PAC)

AngularJS Lead / Lead Associate — Dec 2022 – Present

- Analyzed software requirements and functional specifications for high-concurrency data collection and streaming platforms, architecting and leading frontend development with reusable UI library patterns that cut cross-team development time by 30%.
- Spearheaded migration of large-scale legacy AngularJS codebases to modern Angular (v17+) and micro-frontend architecture, implementing TypeScript and Signals to achieve zero-downtime deployments.
- Designed and implemented a Micro-Frontend Architecture using Module Federation to decouple independently deployable feature teams, enabling parallel development and reducing release coordination overhead across teams.

- Guided and mentored team members on design and development best practices, including NgRx, RxJS, and Angular Signals state management patterns.
- Performed code reviews and maintained technical documentation while enforcing robust engineering standards, introducing Test-Driven Development (TDD) via Jasmine/Karma.
- Optimized automated CI/CD pipelines (Jenkins/GitLab) with lint, test, and build quality gates to ensure consistent release quality.
- Drove adoption of GitHub Copilot and Copilot Chat across the frontend team to accelerate feature delivery, strengthen test coverage, and streamline code reviews without compromising quality.

Frontend Engineer — Dec 2020 – May 2022

- Engineered real-time data visualization interfaces and complex dashboard states handling massive datasets for 500,000+ daily active users (DAUs).
- Collaborated closely with backend teams on RESTful API contracts and payload optimization, writing SQL queries to validate data integrity, reducing frontend data rendering bottlenecks and improving page load latency by 35%.

Lolly.com

Senior Frontend Developer — May 2022 – Oct 2022

- Developed an AI-driven Enterprise Content Management System (CMS) using Angular and reusable, theme-compliant UI components, integrating LLM APIs to power predictive text and asset management features that boosted user workflow responsiveness by 25%.
- Implemented advanced state management strategies using RxJS Observables to handle highly dynamic, multi-threaded user views with zero memory leaks.

KEY PROJECTS

- **Enterprise Demographic Analytics Engine:** Migrated a regional demographic analytics dashboard to the latest Angular framework; engineered role-based access control (RBAC) for multi-tiered user privileges and built complex data-visualization modules for multi-dimensional, nested population datasets with smooth rendering performance.
- **Performance Matrix & Evaluation Portal:** Built highly reactive enterprise evaluation dashboards using AngularJS, Angular 19, and NgRx, managing complex state transitions across heavy data grids and increasing platform transparency and user task completion speeds by 40%.
- **Automated Enterprise HRMS:** Automated internal corporate HR workflows via a unified dashboard mapping employee lifecycles, integrating optimized RESTful APIs for 25% faster automated request processing.
- **Shakespeare & Lolly Apps:** Built responsive, animated AngularJS/Angular UIs using reusable, accessible components, reducing UI bugs by 35% and improving accessibility.

EDUCATION

Bachelor of Technology (Computer Science & Engineering) — Jalpaiguri Government Engineering College, 2016 – 2019

CGPA: 6.81
